EDUCATION

San José State University August 2025 - May 2029

B.S. Computer Science *San Jose, CA*

EXPERIENCE

Research Assistant September 2025 - Present

Reed Systems Group (San José State University) *San Jose, CA*

Disconnected Data Distribution - A project to bring messaging capabilities to disconnected areas such as a natural disaster zone by using transports such as bus drivers' phones to allow the sending and retrieval of data from such areas. GitHub

- Developed much of the notification pipeline to deliver admin notifications typed into a Picocli CLI, through a Java **Spring Boot** server utilizing **gRPC** to specific transport apps, or through transport apps via Wi-Fi Direct, to specific client apps, both of which store said notifications with Room and make them viewable in the UI with the Kotlin Jetpack Compose framework.
- Greatly involved in the **design and planning** of the early-stage DDD dropbox application which aims to allow client and transport apps to exchange data at via an Android phone dropbox eliminating the need for a rendezvous between the transport and client devices.
- Presented DDD to **100+ students, families, and university faculty**, communicating the project and its purpose in a way abstracted enough for understanding outside of the industry.

PROJECTS

Web Crossword Generator

- Led the development of a TypeScript-based Web Crossword Generator website that allows teachers or other users to make topic-based crossword or word search puzzles and print them for use.
- Integrated LLM compatibility to allow users to generate the topic-based puzzles with an LLM of their choice.
- GitHub

InstaDM

- Developed a SwiftUI application that uses a WKWebView with a restricted navigation allowlist to block users from much of Instagram's most addicting functionality while allowing them to participate in DM conversations.
- Ported the app to Windows from macOS with a similar model utilizing WinUI 3 and EdgeWebView2.
- macOS GitHub, Windows GitHub

Portfolio Website (https://rquader.github.io/PortfolioWebsite)

- Thoughtfully designed to convey my journey and document my projects, experiments, and experience with them.

COURSEWORK

Data Structures & Algorithms, Discrete Mathematics, Talking Back to Research: Critical Skills for Leaders
Currently Enrolled In: Introduction to Artificial Intelligence, Introduction to Computer Systems, Linear Algebra I

SKILLS

Java, Git, Claude Code, Cursor, Software Design, Communication, Collaborative Work
